

WIGWAMS & ROBOTS

& SHARKS TOOTH . . . OH MY!

Have we piqued your interest yet?

Investigating Our Past . . . Discovering Our Future

Camp John H. Ware III ♦ 4-day Resident Camp

We're bringing back many Cub Scout camping elements from Ware's past (Project Link is back!) as well as introducing a whole lot of new & exciting ones! These are just a few of the wonderful adventures your Scouts will experience this summer:

- Participate in an archeological dig for authentic SHARK'S tooth fossils that will then be turned into a neckerchief slide at Campcraft.
- Manipulate a real robot through a maze Scouts build themselves.
- Explore a primitive campsite that will include a wigwam, work with large Lincoln logs to build structures & learn primitive methods of building a fire and making rope.
- Engage in over-the-top chants & songs during every meal lead by a staff member sitting at each table.
- (shhhh...) Learn through experiments at the cool new science center.
- Participate in the Webelos Scientist pin program!
- Activity boxes with transitional games will be available for all packs.
- Swimming, hikes, shooting BB guns, slingshots and bows & arrows!

Space will fill up quickly, so contact Amy D. in Camping Administration today to make your reservation! Email: adalesan@bsamail.org Phone: 610-696-2900 (ext. 25)

Discovering Our Future!*

Oh by the way . . . did we mention that the person running our kitchen this summer spends the remainder of his year as a chef at "The Happiest Place on Earth"? You know where a certain mouse ^o_o resides.
